

Technical Datasheet

xemex[®] (zelmeks)

SKU: X2-Y5-7L

EAS: EDSQ05-7YLL

UPC: 850018230049

Xemex is a revolutionary new mixing technology for dispensing two-part adhesives. By utilizing additive manufacturing, Xemex's optimized insert geometry allows seven elements to provide better mixing than 32 or more traditional square and helical mixer elements.

While providing immediate savings in lost adhesive, Xemex's shorter profile brings dispensing much closer to your work surface. Request samples and learn about our full line of Xemex mixing nozzles at remixers.com.

Benefits

- Improve 2k adhesive mixing
- Reduce material waste by up to 75%
- Increase operator dexterity and accuracy
- Simplify manufacturing to fewer mixer SKUs
- Made in the USA, ensuring faster, more reliable lead times

Features

- Xemex's patented mixing technology
- Polyester inserts for moisture-sensitive formulations
- Luer-Lock tip for easy use with needles and accessories
- Optimized for epoxy, methacrylate, urethane, and silicone
- Bayonet connection for use with standard twist-lock cartridges

Insert Material:	Polyester - Yellow
Housing Material:	Polypropylene
Connection Style:	Bayonet
Nozzle Tip:	Luer-Lock
Inner Diameter:	5.3 mm
Insert Assembly:	7 elements
Total Length:	50 mm
Retained Volume:	0.6 mL
Ratios Served:	1:1, 2:1, 4:1, 10:1
